Yes, the data files were too big to post on line, so Louis Berger/HDR will load them onto the hard drive being mailed to you early next week.

Subject: 2012 Single Beam Survey Data Files

Hi Alice,

The only other item that came from Tetra Tech today was that the Subject files did not appear to be loaded or available on OurPassaic. Please note that we were able to locate and download the concurrent multi-beam survey data. Is it possible you all can provide us these files directly on the hard drive transfer, or it may be even easier to post online the single beam survey data files?

Thanks!

Juan
